Plant and Soil **164**: 323–326, 1994.

Contents Volume 164 (1994)

Research articles

Effect of bicarbonate on root growth and accumulation of organic acids in Zn-inefficient and Zn-efficient rice cultivars (*Oryza sativa* L.) 1
X. Yang, V. Römheld and H. Marschner

Natural suppression of take-all disease of wheat in Montana soils 9
O.A. Andrade, D.E. Mathre and D.C. Sands

Simultaneous extraction of soil phytoavailable cadmium, copper, and lead by chelating resin membrane 19
D.-Y. Lee and H.-C. Zheng

Microbial-feeding nematodes and protozoa in soil: Their effects on microbial activity and nitrogen mineralization in decomposition hotspots and the rhizosphere 25
B.S. Griffiths

Growth and elemental content of several sagebrush-steppe species in unburned and post-wildfire soil and plant effects on soil attributes 35
R.R. Blank, F. Allen and J.A. Young

Partition of photosynthates between shoot and root in spring wheat (*Triticum aestivum* L.) as a function of soil water potential and root temperature 43
X. Li, Y. Feng and L. Boersma

Nutrient distribution in a Swedish tree species experiment 51
H.M. Eriksson and K.A.J. Rosen

Allelopathic potential of vegetative and flowering ragwort (*Senecio jacobaea* L.) plants against associated pasture species 61
M. Ahmed and D.A. Wardle

Seasonal accumulation and partitioning of nitrogen by lentil 69
C. van Kessel

Bi-directional transfer of nitrogen between alfalfa and bromegrass: Short and long term evidence 77
G.O. Tomm, C. van Kessel and A.E. Slinkard

Responses to drought and flooding in tropical forage grasses. I. Biomass allocation, leaf growth and mineral nutrients 87
Z. Baruch

Responses to drought and flooding in tropical forage grasses. II. Leaf water potential photosynthesis rate and alcohol dehydrogenase activity 97
Z. Baruch

Proximal root diameter as predictor of total root size for fractal branching models. I. Theory 107
M. van Noordwijk, L.Y. Spek and P. de Willigen

Proximal root diameter as predictor of total root size for fractal branching models. II. Numerical model 119
L.Y. Spek and M. van Noordwijk

Nutrient availability in a montane wet tropical forest: Spatial patterns and methodological considerations 129
W.L. Silver, F.N. Scatena, A.H. Johnson, T.G. Siccama and M.J. Sanchez

Alginate films for delivery of root-knot nematode inoculum and evaluation of microbial interactions 147
R. Rodriguez-Kábana, N. Kokalis-Burelle, S. Kiewnick, R.-P. Schuster and R.A. Sikora

Evaluation of parameters describing the root system architecture of field grown maize plants (*Zea mays* L.). I. Elongation of seminal and nodal roots and extension of their branched zone 155
S. Pellerin, L. Pagès

Evaluation of parameters describing the root system architecture of field grown maize plants (*Zea mays* L.). II. Density, length, and branching of first-order lateral roots 169
L. Pagès, S. Pellerin

Extent of high-affinity iron transport systems in field isolates of rhizobia 177
E. Fabiano, G. Gualtieri, C. Pritsch, G. Polla, A. Arias

Mineralization of carbon and nitrogen in acid forest soil treated with fast and slow-release nutrients 187
T. Aarnio, P.J. Martikainen

Assessment of methylammonium as an analog for ammonium in plant uptake from soil 195
L.E. Jackson, A.J. Bloom

Peanut growth as affected by liming, Ca-Mn interactions, and Cu plus Zn applications to oxidic samoan soils 203
A.W. Bekker, N.V. Hue, L.G.G. Yapa, R.G. Chase

The contributions of plant and bacteria genotypes in the growth and nitrogen accumulation of inoculated alfalfa 213
N.A. Provorov, U.B. Saimnazarov, T.A. Tanriverdiev, B.V. Simarov

Nitrogen uptake in a Norway spruce stand following ammonium sulphate application, fertigation, irrigation, drought and nitrogen-free fertilisation 221
L.-O. Nilsson, K. Wiklund

Subterranean clover decline in permanent pastures in north-eastern Victoria 231
V.F. Burnett, D.R. Coventry, J.R. Hirth, F.C. Greenhalgh

Extractable sulphate and organic sulphur in soils and their availability to plants 243
F. Zhao, S.P. McGrath

Comparison of the chemical changes in the rhizosphere of the nickel hyperaccumulator *Alyssum murale* with the non-accumulator *Raphanus sativus* 251
M.P. Bernal, S.P. McGrath, A.J. Miller, A.J.M. Baker

Chloride absorption and distribution in chlorine-deficient *Pharbitis nil* 261
W. Fueda, E. Hirasawa

Isotope ratios and concentrations of sulfur and nitrogen in needles and soils of *Picea abies* stands as influenced by atmospheric deposition of sulfur and nitrogen compounds 267
G. Gebauer, A. Giesemann, E.-D. Schulze, H.-J. Jäger

Occurrence of *Myrica*-nodulating *Frankia* in Hawaiian volcanic soils 283
S.H. Burleigh, J.O. Dawson

Aluminum accumulation and associated effects on $^{15}NO_3^-$ influx in roots of two soybean genotypes differing in Al tolerance 291
D.B. Lazof, M. Rincón, T.W. Rufty, C.T. Mackown, T.E. Carter

Simultaneous modeling of transient three-dimensional root growth and soil water flow 299
V. Clausnitzer, J.W. Hopmans

Short communication

Fall in nutrient demand per unit root length during the linear phase of plant growth 315
A. Scaife
